# Functional clinic committees

The current national score is 52% for functional clinic committees in South Africa.  
The top three well performing provinces are MP (81%), NW (71%), and EC (71%).  
The following provinces are the lowest performing provinces WC (49%), LP (41%), GP (40%), NC (24%), and KZN (13%).

health

Department:  
Health  
REPUBLIC OF SOUTH AFRICA

Date of Report: 2024-03-24

# NNV Performance: National (Clinics)

Elements: NNV's	EC	FS	GP	KZN	LP	MP	NW	NC	WC	Overall %
193: Emergency trolley is stocked with the medicines, medical supplies and equipment	93%	100%	100%	100%	93%	100%	100%	94%	99%	97%
196: Functional oxygen cylinder with pressure gauge is available in resuscitation/ emergency room	97%	100%	100%	100%	98%	100%	100%	98%	100%	99%
197: Oxygen available in the cylinder is above the minimum	98%	100%	100%	100%	98%	100%	100%	98%	100%	99%
232: Emergency trolley is stocked with medicines, medical supplies and equipment	95%	97%	100%	99%	86%	99%	99%	88%	99%	97%
236: Emergency trolley in the MOU is stocked with medicines, medical supplies and equipment	95%	100%	100%	99%	86%	99%	99%	87%	100%	96%
238: Functional oxygen cylinders with a pressure gauge is available	98%	100%	100%	97%	95%	99%	100%	97%	99%	98%
239: Oxygen available in the cylinder is above the minimum level	98%	100%	100%	97%	89%	99%	99%	96%	100%	98%
<b>Average</b>	<b>96%</b>	<b>100%</b>	<b>100%</b>	<b>99%</b>	<b>92%</b>	<b>99%</b>	<b>100%</b>	<b>94%</b>	<b>100%</b>	<b>98%</b>

- There are four provinces that have performed well with an average score of 100% namely, GP (100%), FS (100%), NW (100%), and WC (100%). The following three provinces failed to score 100% on the NNV's and only managed to score an average below 95% namely, LP (92%), NC (94%), and EC (96%).
- While the following two provinces need technical assistance to achieve an average score of 100% namely, KZN, and MP both scored an average score of 99%.
- There are three elements that are challenging for most provinces namely, "236: Emergency trolley in the MOU is stocked with medicines, medical supplies and equipment", "232: Emergency trolley is stocked with medicines, medical supplies and equipment", and "193: Emergency trolley is stocked with the medicines, medical supplies and equipment".

# Recommendation (ICRM)

Based on the data presented above, it's evident that while there have been significant achievements in overall status determination by ICRM, there are notable disparities among provinces in South Africa. The distribution of facility statuses reveals a substantial number with platinum status (2284 facilities), followed by gold (278 facilities) and silver (42 facilities), indicating a generally high level of compliance. However, the challenge lies in addressing the 41 facilities that failed to conduct their status determination, particularly in provinces like WC, GP, and FS. Furthermore, the national score of 52% for functional clinic committees indicates room for improvement in governance and operational efficacy across the country.

To address these disparities and improve overall performance, a multifaceted approach is necessary. Provinces like MP, NW, and EC should be recognized for their exemplary performance and could potentially serve as models for others. Technical assistance should be prioritized for provinces like KZN and MP, which have shown promise but need support to reach a consistent 100% average score. Moreover, addressing common challenges such as ensuring emergency trolleys are stocked with medicines, supplies, and equipment (as outlined in elements 236, 232, and 193) is crucial for enhancing the quality of care nationwide. By focusing on targeted interventions, sharing best practices, and providing necessary resources, South Africa can work towards achieving more equitable healthcare standards across all provinces.

Department:  
Health  
REPUBLIC OF SOUTH AFRICA

Date of Report: 2024-03-24

# Conclusion (ICRM)

In conclusion, the data underscores both achievements and challenges within South Africa's healthcare system. While certain provinces have demonstrated commendable performance in areas like status determination and committee functionality, others lag behind, highlighting disparities that need urgent attention. It's imperative for stakeholders to leverage successful models from provinces like MP, NW, and EC while providing targeted assistance to those struggling to meet standards, such as KZN and MP. Additionally, addressing common obstacles like ensuring stocked emergency trolleys can enhance overall healthcare quality and preparedness.

Moving forward, a collaborative and targeted approach is essential to bridge the gaps and ensure equitable healthcare access and quality across all provinces. By fostering partnerships between high-performing provinces and those in need of support, and by prioritizing interventions to tackle common challenges, South Africa can work towards a more uniform healthcare landscape. Ultimately, these efforts can lead to improved health outcomes and better overall well-being for all citizens, fulfilling the nation's commitment to providing accessible, high-quality healthcare services for every individual.

# Governance Structures: District Hospitals

National: Governance Structures Performance for District Hospitals	EC	FS	GP	KZN	LP	MP	NW	NC	WC	Overall I
361. Appointment letters for members of the governance structure are signed by the relevant authority in terms of the National Health Act	95%	97%	100%	52%	98%	83%	100%	54%	88%	85%
362. Governance structure has clear TOR	85%	97%	94%	53%	97%	94%	99%	38%	82%	82%
363. Governance structure meetings are held in accordance with the TOR	85%	97%	85%	45%	73%	72%	94%	31%	86%	75%
364. Minutes of meetings of the governance structure indicate that strategic plan and/ or Annual Performance Plan of the hospital are discussed regularly and monitored	88%	100%	85%	53%	85%	66%	94%	23%	86%	78%
365. Remedial action is implemented to ensure achievement of strategic targets where it has been identified that the targets may not be met	91%	94%	82%	56%	86%	63%	94%	15%	76%	77%
366. Minutes of meetings of the governance structure indicate that quality of care in the hospital is discussed regularly and monitored.	89%	100%	88%	55%	83%	76%	100%	15%	84%	79%
<b>Average</b>	<b>89%</b>	<b>98%</b>	<b>89%</b>	<b>52%</b>	<b>87%</b>	<b>76%</b>	<b>97%</b>	<b>29%</b>	<b>84%</b>	<b>79%</b>

- Only two provinces (KZN, and NC) did not manage to achieve the average score on the above elements, while other provinces reached the average (green) scored District Hospitals' governance structures.

health

Department:  
Health  
REPUBLIC OF SOUTH AFRICA

Date of Report: 2024-03-24

# Governance Structures: District Hospitals (Cont...)

As per the report, almost half do not have appointment letters in KZN province, “Appointment letters for members of the governance structure are signed by the relevant authority in terms of the National Health Act”.

NC province only has managed to score positively on two elements (Governance Structure has clear TOR and Appointment letters for members of the governance structure are signed by the relevant authority in terms of the National Health Act), while all other performance elements – are under-scored.

The majority of KZN, District Hospitals do not discuss the “External audit reports with the governance structure” as a result, they have scored 46%.

Followed by “Hospital has received an unqualified or emphasis-of-matter audit result from the Auditor General” scored 45%.

Department:  
Health  
REPUBLIC OF SOUTH AFRICA

Date of Report: 2024-03-24

# Recommendation (IHRM)

- District Hospitals across South Africa have made significant strides in achieving high overall status determination, with an impressive 96% total at the national level.
- Notably, four provinces - Free State, Mpumalanga, KwaZulu-Natal, and Limpopo - have achieved a perfect 100% status determination, showcasing exemplary performance.
- However, challenges persist in certain provinces, particularly Gauteng, Western Cape, North-West, and Northern Cape, which reported lower scores ranging from 82% to 92%.
- Despite these variances, Gauteng and Western Cape stand out as the better-performing provinces, boasting average scores of 98% and 97%, respectively.

health

Department:  
Health  
REPUBLIC OF SOUTH AFRICA

Date of Report: 2024-03-24

# Recommendation cont... (IHRM)

- A closer examination reveals specific areas of improvement, particularly in emergency preparedness and governance structures.
- Elements such as the stocking of emergency trolleys, access to emergency resuscitation within three minutes, and functional systems for supplying piped oxygen emerged as the lowest performing aspects.
- Moreover, governance issues, such as the absence of appointment letters and inadequate discussion of external audit reports, were notable concerns, particularly in KwaZulu-Natal and Northern Cape.
- Addressing these deficiencies through targeted interventions and capacity building initiatives can enhance the overall effectiveness and quality of healthcare services in District Hospitals across South Africa.

health

Department:  
Health  
REPUBLIC OF SOUTH AFRICA

Date of Report: 2024-03-24

# Conclusion (IHRM)

- In conclusion, while District Hospitals in South Africa have made commendable progress in overall status determination, disparities persist across provinces, highlighting the need for targeted interventions to address specific challenges.
- The exemplary performance of Free State, Mpumalanga, KwaZulu-Natal, and Limpopo underscores the potential for success through effective governance structures and emergency preparedness.
- Moving forward, it is imperative for DoH (Provincial and Districts – supported by NDoH) and partner organisations to prioritize capacity building initiatives and targeted interventions aimed at addressing the identified deficiencies (such as governance structures and achieving 100% scores for NNV's).
- By enhancing emergency preparedness, strengthening governance structures, and fostering collaboration between provinces, South Africa can work towards achieving equitable healthcare delivery across all District Hospitals, ultimately improving health outcomes for all citizens.
